

Executive KPI Report

NovaCRM

Synthetic-data demonstration. Fictional company; these are not observed business results.

2024-01 - 2025-12

Generated on September 05, 2026

Executive Summary

NovaCRM's overall health score stands at 73.5/100, reflecting a moderate position. MRR reached \$970K with 1.8% month-over-month growth. Logo churn remains well-controlled at 1.5%. NPS of 51 reflects strong customer satisfaction.

Health Score: 73.5 / 100

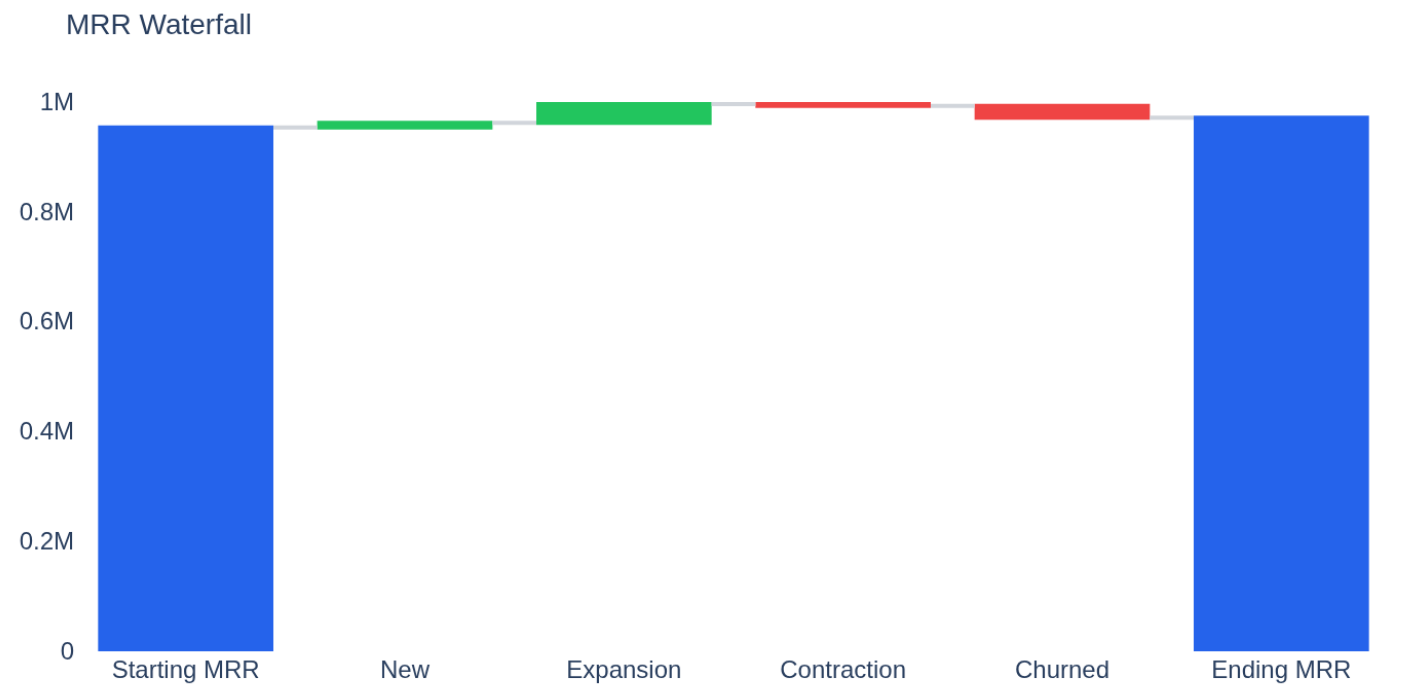

KPI Dashboard

Values for the last selected month. Targets and health score are illustrative assumptions, not validated benchmarks.
Source: synthetic NovaCRM data, seed 42.

KPI	Value	MoM %	Target	YoY %	Status	Category
MRR	\$970K	+1.8%	\$950K	+51.9%	GREEN	revenue
ARR	\$11.6M	+1.8%	\$11.4M	+51.9%	GREEN	revenue
NRR	112.3%	+2.8%	110.0%	+4.8%	GREEN	revenue
Logo Churn	1.5%	-39.7%	2.0%	-30.6%	GREEN	customers
Revenue Churn	2.3%	-1.5%	1.5%	+8.4%	RED	customers
NPS	51	+0.6%	55	+62.7%	YELLOW	customers
LTV:CAC	17.3x	+76.8%	3.5x	+93.5%	GREEN	efficiency
Rule of 40	102	-1.5%	40	-3.1%	GREEN	efficiency
Gross Margin	80.4%	+2.1%	75.0%	+2.5%	GREEN	efficiency
DAU/MAU	39.5%	+0.4%	25.0%	+10.1%	GREEN	engagement
CAC	\$8K	-5.0%	\$800	+3.9%	RED	efficiency
Payback Period	3 mo	-6.1%	12 mo	-26.2%	GREEN	efficiency

Revenue Analysis

Monthly Recurring Revenue (MRR) stands at \$970K, translating to an ARR of \$11.6M. Net Revenue Retention (NRR) is 112.3%, exceeding the 100% benchmark. Net expansion dynamics are positive: \$34,247 in expansions vs. \$3,425 in contractions and \$21,538 in churn.

MRR bridge (USD): starting balance + new + expansion - contraction - churn = ending balance. Source: synthetic NovaCRM data; last selected month.

Customer Health

The active customer base stands at 395 with an NPS of 51. Logo churn rate is 1.5% while revenue churn is 2.3%. 124 support tickets were logged in the period.

Anomaly Alerts

1 critical anomaly(ies) detected: revenue_churn_rate in 2024-07. These values exceed 3 standard deviations from the historical mean. Additionally, 9 metric(s) show warning-level deviations that merit close monitoring.

All segments; selected months. Z-score: mean and bounds +/-2 sample standard deviations. IQR: median and Q1-1.5*IQR / Q3+1.5*IQR bounds. These are descriptive baselines, not forecasts. Severity uses |z| for both methods.

Recommendations

1. Accelerate MRR growth

MRR growth of 0.0% is sluggish. Consider new pricing strategies, product expansion, or market penetration initiatives.
